Professional Experience

Fusion of Ideas

Senior iOS Developer (April 2014 - Present)

- Worked with other members of the iOS team, web development team, and design team to produce mobile applications for clients and internal projects.
- Involved in full product life cycle, from design to deployment and maintenance, for small and large scale projects.
- Performed two-week sprints following the Agile methodology to ensure timely updates and deliverables for our clients.
- Created and maintained our internal CocoaPods library and Swift Package, containing useful helper methods and extensions.
- Setup CoreData and Realm models to map JSON data from web services into objects.
- Implemented custom designs for numerous applications using Storyboard and .xibs, along with constraints to allow usage across all sizes of iPhones and iPads.

Technologies

- Swift, Objective-C, XCode IDE, C#/Unity
- Third party frameworks including: Alamofire, AFNetworking, Realm, MagicalRecords, Firebase, RxSwift

Personal Projects

See dyessayian.com for more details.

- **Reciplease** - An App Store iPad application that is user friendly and designed to store, sort, and search through recipes.
- **Primal Audio** - An App Store iPhone/iPad application that allows the user to play a mix of various ambient nature sounds for relaxation.
- **Pirate Dice Tracker** - An App Store iPad application made to go along with a game of Pirate's Dice or Liar's Dice.

Education

Cal State University Fullerton (August 2008 – May 2013)

Fullerton, CA: Bachelor of Science, Computer Science (cum laude)
